SOLUTIONS

PocketECG Holter

The portable, lightweight and easy to use PocketECG is prescribed for 14 or more days.

3 leads easily connect to chest electrodes. The single unit monitor continuously sends ECG data wirelessly in near-real time for faster reporting.

Continuous 3-channel recording

Leads I, II and III

Near-real time data transmission

Allows urgent event (PNC) notification

14+ days of service

Extended service for inconclusive findings

Easy home hook-up

No impact on clinical work flow

Rapid report turnaround time

Faster time to diagnosis and treatment

Event marker & digital diary

Easy event and symptom correlation

Mail back device

No return visit required by patient
